

Osanga Yusuf

Software Engineer

+234-8178374932 | osangayusuf@gmail.com | [Linkedin](#) | [Github](#) | Nigeria

Result-driven **Full-Stack Software Engineer** with 3+ years of experience designing **scalable backend architectures** (Laravel) and **modern frontend interfaces** (React/Vue). Combines robust software engineering practices with a foundational background in **Telecommunications Engineering** and **Cloud/Cybersecurity** certifications (Azure, Google) to build secure, high-performance web applications."

TECHNICAL SKILLS

- **Devops and Cloud:** Azure, Docker, Linux, Git
- **Backend Architecture:** PHP(Laravel), RESTful API Design, MySQL, MariaDB, Redis, Laravel Queues
- **Frontend Development:** JavaScript (ES6+), ReactJS, VueJS, NextJS, NuxtJS, Tailwind CSS
- **Core Web Foundations:** HTML5, CSS3, SQL, Vite

SOFT SKILLS

- **Problem-Solving and Analysis:** Applied a strong technical background in Telecommunications Engineering to complex problem-solving and analytical challenges.
- **Communication & Collaboration:** Worked effectively within cross-functional and multidisciplinary teams, maintaining excellent oral and written communication with both technical and non-technical stakeholders.
- **Professionalism & Ownership:** Demonstrated a proactive mindset, taking full ownership of project tasks from design to deployment and maintenance, ensuring high code quality.
- **Organization:** Maintained strong time management and organizational skills to ensure timely and excellent project delivery.

EXPERIENCE

Fullstack Engineer - Tech Hill City International

NOVEMBER 2025 - PRESENT

- Took full ownership of the web application lifecycle, from conception and building up to deployment, for new websites.
- Conducted regular monitoring, evaluation, and Quality Assurance (QA) tests to ensure web applications met high standards for quality and performance.
- Utilized AI-assisted development workflows for boilerplate generation and unit testing, reducing sprint delivery times by 50%.
- Monitored service uptime and performance metrics, ensuring clear communication and alignment on system health with cross-functional teams.

Fullstack Engineer - The Nebula

MARCH 2025 - NOVEMBER 2025

- Worked across multiple client projects ensuring timely project delivery with excellent attention to detail.
- Leveraged AI-assisted development workflows to cut down development time by over 50%.
- Collaborated effectively with technical and non-technical stakeholders to ensure clear communication and successful alignment on project requirements and delivery.
- Managed and optimized database schemas to accurately support complex business workflows and data requirements.
- Utilized Laravel Queues for processing asynchronous tasks like email notifications and data imports to enhance application responsiveness.
- Set up monitoring hooks to ensure seamless operation of APIs in production environments.

Volunteer Web Developer - Zurfte Empowercare Foundation

NOVEMBER 2024 - MARCH 2025

- Played a key role in a website migration, transitioning from a static HTML, CSS, and JavaScript foundation to a dynamic and scalable React.js architecture.
- Significantly improved website performance and maintainability through the development of reusable React components and the implementation of effective state management strategies.
- Enhanced the website's visual design and responsiveness by integrating Tailwind CSS for styling.
- Effectively collaborated with development teams and stakeholders, utilizing Trello for requirement gathering, progress updates, and ensuring project satisfaction.

Fullstack Web Developer - Turtle Consulting

JANUARY 2023 - MARCH 2025

- Architected and deployed robust RESTful APIs using PHP (Laravel) to power four distinct client web applications, implementing clean OOP principles and optimized database schemas to handle complex business workflows.
- Developed dynamic, responsive user interfaces using ReactJS, optimizing client-side state management and building reusable components to ensure seamless, high-performance user experiences.
- Streamlined application efficiency by integrating critical third-party APIs and implementing strategic caching mechanisms, significantly reducing API response latencies and server load.
- Managed the end-to-end deployment lifecycle and ongoing server maintenance on G054 infrastructure, ensuring high application availability, code quality via rigorous testing, and consistent system uptime.
- Collaborated directly with clients for requirement gathering and monitored service uptime, providing regular performance metric updates to align technical delivery with business goals.

EDUCATION

Federal University of Technology, Minna— *B. Eng Telecommunications Engineering*

SEPTEMBER 2018 - JANUARY 2025

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals, 2023
- Cisco Networking Basics, 2023

- Cisco Introduction to Cybersecurity, 2023
- Cisco Network Defense, 2023
- Google Cybersecurity Professional, 2024
