

Osanga Yusuf

Full-Stack Laravel Developer

Nigeria | +2348178374932 | osangayusuf@gmail.com | Github | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with a foundational background in Telecommunications Engineering and a proven track record of designing, delivering, and maintaining high-availability web applications within the **PHP/Laravel** ecosystem. Expert in architecting secure RESTful APIs, optimizing relational database schemas, and collaborating with cross-functional UX teams to deploy valid, consistent client-side applications. Adept at managing the entire software development life cycle (SDLC) from concept to post-launch support within Agile environments, bridging the gap between resilient infrastructure and scalable software systems.

CORE TECHNICAL SKILLS

- **Backend Engineering:** PHP (Laravel), OOP Architecture, RESTful API Design & Integration, Laravel Queues
- **Database Management:** MySQL, PostgreSQL, MariaDB, Redis Caching, Query Optimization
- **Frontend Engineering:** JavaScript (ES6+), HTML5, CSS3, ReactJS, Tailwind CSS, Vite
- **DevOps & Cloud:** Microsoft Azure, Docker Containerization, Linux Administration, Git-based Workflows (Gitflow), CI/CD pipelines
- **Processes & Practices:** Agile methodologies, SDLC Management, Documentation, Cross-functional Liaison

CORE PROFESSIONAL EXPERIENCE

Full-Stack Engineer – Tech Hill City International & The Nebula

March 2025 – Present | Abuja, Nigeria

- **Led the entire web application development life cycle** from initial concept stage through delivery and post-launch support for portal plus premium service platforms.
- **Architected and scaled high-throughput RESTful APIs** utilizing **PHP (Laravel)**, optimizing relational database structures (**MySQL and Postgres**) to seamlessly process complex backend data workflows.
- **Collaborated closely with the User Experience (UX) team** to build state-of-the-art features, ensuring all **HTML5, CSS3, and shared JavaScript** code was fully valid, modular, and consistent across platforms.
- **Integrated Laravel Queues and Redis caching layers** for asynchronous task handling, reducing server processing loads and increasing application responsiveness by **35%**.

- **Served as technical liaison between development staff and the project manager**, communicating progress updates, performance evaluations, delivery schedules, and technical risks to keep stakeholders fully informed.
- **Documented the development process, system architecture, and standard reusable components**, lowering onboarding friction for incoming co-developers.
- **Orchestrated application lifecycles** by coordinating containerized deployments with **Docker** in managed **Linux** environments to achieve absolute environment parity across staging and production.

Full-Stack Web Developer (Contract) – Turtle Consulting

January 2023 – March 2025 | Remote / Nigeria

- **Designed and deployed enterprise-grade web applications** using clean, Object-Oriented Programming (OOP) principles within the **PHP/Laravel** framework.
- **Contributed to and expanded existing backend data service APIs**, improving data ingestion reliability and integrating third-party service endpoints smoothly.
- **Optimized database performance and query indexing** within **MySQL/PostgreSQL** environments, achieving a **30%** reduction in API response latencies and server overhead.
- **Developed dynamic, high-performance user interfaces** using **ReactJS** and modern frontend tools, translating technical specifications into seamless user experiences.
- **Managed codebases and version control using Git-based workflows**, utilizing strict code reviews, branching strategies, and pull request protocols to maintain production branch integrity.
- **Prepared and maintained web applications** utilizing standard development tools (**Vite, Tailwind CSS**), keeping platforms continuously updated with modern web development best practices.

TECHNICAL TRAINING & INFRASTRUCTURE EXPERIENCE

AI & Data Science Professional Trainee (NYSC Placement) – NCAIR / NITDA

August 2025 – Present | Abuja, Nigeria

- **Engineered a Document RAG (Retrieval-Augmented Generation) System** using Python, implementing vector embeddings and text chunking to transform unstructured technical documents into searchable components.
- **Designed and built an operations dashboard** utilizing advanced data manipulation libraries to clean, aggregate, and process complex regional consumption data into automated technical insights.
- **Developed an Object-Oriented smart application** using custom logical structures to parse multi-source inputs, automate allocations, and securely track application state changes.

Network Support Engineer (IT Internship) – Net Access Communication

September 2023 – January 2024 | Jos, Nigeria

- **Deployed and maintained local and wide-area network (LAN/WAN) infrastructure**, troubleshooting routing and switching hardware issues to minimize latency.
- **Maintained detailed system and network mapping documentation**, streamlining troubleshooting lifecycles for technical support personnel.

EDUCATION

- **Federal University of Technology, Minna** – B.Eng. in Telecommunications Engineering (September 2018 – January 2025)

PROFESSIONAL CERTIFICATIONS

- Certified LLM Security Professional – Red Team Leaders (2026)
- AWS AI & ML Scholar – Udacity (2026)
- Google Cybersecurity Professional Certificate – Coursera (2024)
- Microsoft Certified: Azure Fundamentals – Microsoft (2023)
- Cisco Network Defense / Networking Basics – Cisco (2023)
